Ultra High Voltage Power Resistors Series 1000
Precision, Non-Inductive, Low TC

Ultra High Voltage Resistors Series 1000 combine proprietary non-inductive design with uniform voltage distribution to achieve low temperature coefficient, low voltage coefficients, high stability and increased operating voltages to 500 kV. These Ultra High Voltage Resistors are designed to meet the demanding requirements of high voltage test systems, X-ray industrial systems, geophysical military instruments and HVDC power transmission lines.
